

# PureCleanUVC™ 25

Wild Ideas Light Co Ltd™

Portable UVGI Lamp

Model WILDC-UVGI25

The PureCleanUVC 25™ from Wild Ideas Light CO is a specially designed UVC light which kills microorganisms on surfaces such as plastic containers, countertops, cash registers, doorknobs, toys, cardboard boxes, computer screens and keyboards. This is the perfect alternative to chemical surface treatments , the portable UVGI lamp can produce strong enough UVC light to make environments inhospitable to bacteria, viruses, molds and other pathogens.

UVC light has long been used as an effective disinfectant for water, air and surfaces in hospitals and commercial operations as a substitute for chemical treatments. The PureCleanUVC 25™ is designed for both commercial and home use and features a high power UVC bulb in a lightweight portable fixture.

**WARNING: UVC LIGHT CAN DAMAGE SKIN AND EYES. ALWAYS USE PROTECTIVE EYEWEAR AND GLOVES.**

## Benefits

Kills 99.9% of Microorganism's that spread diseases (virus, bacteria, molds, yeast).

Quick and effective - without touching infected surfaces.

Works where chemical treatments are ineffective

Portable - easy to use.

## Features

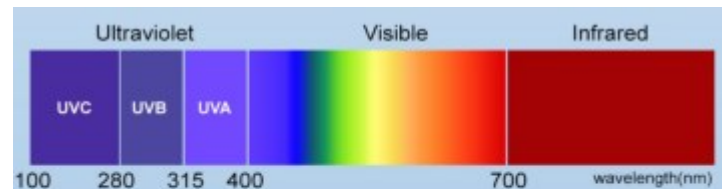

Made In the USA , in colorful Colorado

Light Weight : 3.5 Lbs

8000Hr Bulb Safety Switch.

25 watt UVC Bulb for quick Surface cleaning

Includes UV Safety Glasses and Gloves

*Ultraviolet germicidal irradiation (UVGI) is a disinfection method that uses short-wavelength ultraviolet (ultraviolet C or UVC, 100nm – 280nm) light to kill or inactivate microorganisms by destroying nucleic acids and disrupting their DNA, leaving them unable to perform vital cellular functions.*

**WARNING: UVC LIGHT DAMAGES SKIN AND EYES. ALWAYS USE PROTECTIVE EYEWEAR AND GLOVES**

## Product Specifications:

---

Weight: 3.5lbs

Wattage: 25

UVC Wavelength: 253, UVC Lamp Length 20"

Radiation Intensity: 600  $\mu$ W/cm<sup>2</sup> from 4" distance

Voltage 120V AC Only

On/off Safety Switch, 10' cord

Dimensions: 20" x 6" x 6"

## How To Use

Remove any visible soiled area on surface. Put on protective eyewear and gloves. While holding light no more than six inches from surface, push down red button. Scan slowly over surface from either direction in a sideways motion (approximately 10 seconds per square ft). This will flood entire area with UVC light. Repeat as necessary after every use of area or object.

**WARNING: UVC LIGHT DAMAGES SKIN AND EYES.  
ALWAYS USE PROTECTIVE EYEWEAR AND GLOVES**
